RESEARCH INTERESTS

On-Device AI, AI for Systems, Knowledge-guided Neural Network Design

EDUCATION

University of Pittsburgh, Pittsburgh, PA
Ph.D. student, Electrical and Computer Engineering
Advisor: Prof. Wei Gao

On-going

University of Science and Technology of China (USTC), Hefei, Anhui,
B.E., Electronic Information Engineering

July 2019

RESEARCH EXPERIENCE

Research Assistant

2019-present

Dept. of Electrical and Computer Engineering, University of Pittsburgh

- Designing a selective training scheme that can accelerate on-device neural network training.
- Developed and implemented an offloading scheme that allows extremely weak devices (e.g., MCUs with <1MB memory) to achieve real-time (<20ms) neural network inference. It is the first work that leverages Explainable AI to speed up neural network inference on weak devices.
- Developed and implemented a backscatter system that leverages neural network inference to improve its RF energy efficiency by up to 3.5x. The neural network is tailored based on the domain knowledge of backscatter communication, and hence is very lightweight and can be effectively trained even with a limited amount of data.

PUBLIC SPEAKING **Presentations**

1. "AiFi: AI-Enabled WiFi Interference Cancellation with Commodity PHY-Layer Information." In Proceedings of the 20th ACM Conference on Embedded Networked Sensor Systems (SenSys), Boston, USA, Nov 2022.
2. "Real-time neural network inference on extremely weak devices: agile offloading with explainable AI." In Proceedings of the 28th Annual International Conference on Mobile Computing And Networking (MobiCom), InterContinental Sydney, Australia, Oct 2022
3. "RAScatter: Achieving Energy-Efficient Backscatter Readers via AI-Assisted Power Adaptation." In 2022 IEEE/ACM Seventh International Conference on Internet-of-Things Design and Implementation (IoTDI), Virtual, May 2022
4. "Towards Real-time Neural Network Inference on Extremely Weak Devices", Elijah Group Meeting, Dept. of Computer Science, Carnegie Mellon University, November 2021
5. "Tailoring Neural Network Designs to Computing System Domains", Elijah Group Meeting, Dept. of Computer Science, Carnegie Mellon University, March 2021

TEACHING AND MENTORING EXPERIENCE

Teaching:

- **Teaching Assistant**, ECE1175 - Embedded Systems Design Spring 2021
Dept. of Electrical and Computer Engineering, University of Pittsburgh
- **Teaching Assistant**, ECE1175 - Embedded Systems Design Fall 2020
Dept. of Electrical and Computer Engineering, University of Pittsburgh
- **Teaching Assistant**, ECE0202 - Embedded Processors and Interfacing Spring 2020
Dept. of Electrical and Computer Engineering, University of Pittsburgh

PROFESSIONAL ACTIVITIES

Journal Reviewer

- IEEE Transactions on Mobile Computing

Conference Reviewer

- IEEE International Conference on Mobile Ad-Hoc and Smart Systems (MASS) 2022,
- IEEE Conference on Computer Communications (INFOCOM), 2022, 2023
